SuperTech

BTW, has anyone tried Teamspeak? One of the co-workers gave me a headset and I tried it last night on Fastc0nn 3. It was pretty cool: I was in the lobby of Fastc0nn3 and I was on GDI listening to NOD team members talking about our advances, pretty freaky actually!

well if you sign up for the all-star games on renstation.net (you have to go on the forums) everybody will be using teamspeak. not too many people use it when they are playing a normal game on the fastc0nn servers.
