dufis791cool...
both work, but most ppl dont know how to find/use Regedit.....
lol

but this also tells how to do in-game movies..

so you are telling me that i can make a new in-game movie by opening Notepad, then saving its empty file as a .bik!!!!11!!11

OMG WTF LOL!!11!1!11!!!

thats not even close to what you need to do, but whatever.

.BIK is a compressed Bink and Smacker avi file that is common for EA games to use for there intro movies and in game movies.
