Something was said about the pits and some other server using vlokts building log script without permission (the pistol in the wf and ob) Then the thread on n00bstories, one thing lead to another now he doesnt want to release it.

Ack, this isnt an attack against you or whatever but. When you say it is more suited to death match.. why is that? because you can pick up weapons, wouldnt it stand to reason that a soldier would pick up ammo/weapon from the enemy and use it to complete an objective. Why isnt it suited to c&c mode?
