How did you get Microsoft to look like that? I've got that theme for StyleXP, but the bar was on the bottom and there wasn't that quick start thing on the bottom.

Here's my desktop pictures:

Yes, I'm a big fan of Halo.

That is a mac computer running a mac OS.... :rolleyes:

It's a windows box running in a Mac OS skin

Like you can get gmax for OSX let alone Halo
