You miss the entire point I'm making. I've told you before that airborne units aren't balanced out either, but nope, don't acknowledge that...

I'm not talking about APCs, I'm talking about sniper units and the absurd amount of damage that they do to seven VEHICLES that normally shouldn't be damaged by them in the RTS game... Or how the units they can't destroy give them 10-25 points per shot... It's real great that I can get almost 100 points from a Stealth Tank by just shooting it four times with a Havoc...

Everything in the game balances out if it were kept in line with the RTS.
