Twizdid

<http://web.black-cell.net/dragonade.txt>

is what the server side script does, im not meaning this to be like were waving it in your face etc, its to show ack how the script isnt so much a deathmatch type thing and can be used in normal c&c with no inbalances.

Then why not PM it to him, instead of posting it publically, where surely many people will ask for it only to be turned down
