snipesimoThis is on Crimson79 server where the newest version is installed. Its the return of the spawn pistols! http://www.n00bstories.com/image.fetch.php?id=1252156893

Those pistols are getting on my nerves..

Emergency build released:
- Positively sure the pistol dropping glitch has been destroyed.
- Fixed a glitch where some 2nd skins of characters were killed no matter
  what the server settings were.
