TheGunrunBTW: im still agenst him using our funds on this. Our seniors need coverage if they are poor u know and were in great debt. Just imagin if we find a alien civilazation thou, we could be much better off or dead...

We got more then enough money to fund them... But it gets split up into the differnt divisions of NASA so much thats there only a few billion left for each sector. most goes toward shuttle launches, 16,456 billion\$
