---

Can somebody who knows what they are doing model a gun for me? I downloaded a weapons pack from [cnc-source.net](http://www.cnc-source.net), as well as Renegade 2 models which I want to know if anyone has boned yet. I mostly want a Desert Eagle and another gun I forgot the name of. If somebody will help me, please leave their email so I can send the models to you, or download them at <http://www.cnc-source.com>

Thanks!
