as for a sound modifier, i have one. its called TURNING UP YOUR SPEAKERS. you can hear anything as long as long as you dont go deaf from the sound. as for stealth skin, i think there must be one. now i shoot randomly in a direction sometimes when i know a stank is near, to hope for splash damage. damage is the only way you can see something without a cheat, if one exists. then again, if they can make final renegade, they can make stealth skins that are never hidden.
