ACK, I wasn't fooled. I am just making the warfactory and giving it to Titan so he can set it up and use it in his map. Then he will release it for everyone to use in their maps if they wish.

Yes I modeled it and I am texturing it. After that it is up to Titan.

I could care less about who gets all the credit about it. As long as it says "Modeled and textured by Deafwasp", that's all I want.
