Bombariol thought this was the best place to ask, since most modders have used the XCC mixer. I'm talking converting soundtracks (.aud) into wav. Any help? When you right click on an aud, there's an option "Convert to WAV", but when I click it, it does absolutely nothing.

I'm so confused....

Use the VQA-AVI2 v1.35 Converter

Available at: <http://ra.afraid.org/html/downloads/utilities-4.html>

2nd one down the list
