I looks good seeing as you just had acrash course in photoshop

The boat is especially well done, it adds a certain feel of proffesionalism to the layout.

Although I am not too fond of the emboss effect in this context, I suppose it is too hard for my taste, or that may just be me.

Again the boxes look good and the three lines add a break to the flow of the page in a positive manner.

Blue, black & white are always tricky to get right as well, it seems to work nicely here with a mild exception of the font on the buttons (amateurish) and at the top of the page, it works but it just needs something...

I think that the placing and style of the logo will be crucial in rounding off the design of the site.

Altogether not bad at all
