There is actually 2 of them. One get a Nod Stealth Guy and have a technician put c4 proximity mines on you. I did that once and some noobie with a sniper rifles started screaming omg nod is cheating they have flying mines lol. My second trick that i do is get a stealth suit guy and if the game has spawnign weapons then youre in for a lot of kills and very less deaths. Since if u get lucky enough to find a sniper rifle u can ez camp somewhere and hs everytime u see someone. Another idea is putting proximity mines on buggies and humveews thus creating a suicede car explosion. one more thing i like to do is get on top of a hill where u can see peopel runing and take a quick look at someone so their life bar appears and go back into hiding. thern just use jump to jump and shoot that person since their life bar gives away where they are for like 10 seconds.
