Do you believe EA ruined renegade? Does it piss you off thinking they cut Westwood off? Or maybe the fact that they closed most support for the game so that they could rush E&B. I think EA owes this community a load of patches/updates to the game. We wasted countless dollars combined for this game and what did they do for us? Took our money and ran. Pretty pathetic, that a company would like to make an impression on the gaming community like that.

Simply sign Yes or No !

Yes they ruined it.

No I don't believe they did.
