Subject: Renegade Alert 0.992b Released!
Posted by General Havoc on Sun, 25 Jan 2004 18:26:38 GMT

TaximesI still get the startup error. Haven't been able to play yet (Yes, I installed the VB runtime files, redownloaded RenAlert completely (twice), patched, etc)

Unless I replace the RenAlert game.exe with the regular Renegade one, but I highly doubt that's safe.

I had the same problem. http://www.renevo.com/renalert/forum/showthread.php?s=&threadid=724 seemed to fix it though.
