wreaker\_of\_havoc They seem a little useless, dont you think? They are killed at about average ease, their rockets are nothing special, they are perfectly visible unless a) you are blind or b) they're right up against snow or a blue sky. Their range is medium, and they're useless close up (as you can very easily see the shimmer). Are there any strategies with Stealths that make them less useless?

Rushing, hiding accross the field, sneaking in to a base when no one is looking and nuking, hanging around a fair few eyes distance away, and running down the engi that tried to disarm it.

It's easily stopped, but most definately effective.
