Subject: oh, hi

hummm....begginig to feel threatened? feel like maybe this can result in better maps than those you create? laeubi is right, you are a jack ass. you care for no one but yourself. ever heard of "constructive criticizm"? oh, i know thats a new concept for you aint it. i speak for the comunity when i say that you seam to think your perfect at everything, and that no one is worthy to try.

dont even think bout saying "y dont you be nice to me then?" cuse heres the answer:

"I dont respect those who cant respect me or others, if you cant be a nice person, dont expect others to be nice to you."

oh, and heres a hint: u cant demand respect, you have to earn it

i though you were good, i used to be amazed at your maps, but no longer. you dont care bout others, you dont help, you just hinder. just be kind to others, help them be better. oh yea, forgot, you want to be the best, and dont want to lose that position.

-----

I can do nothing but roll my eyes at that stupidity and how many times he contradicts himself... Maybe I'd feel "threatened" if you were able to create rational thoughts...
