Hey guys, its time for me to admit the truth, and get this over with.

I am not the best person at PhotoShop, but i can hold my own weight if i have to, although, logo design is definately something i need A LOT of work on.

So, to help move this along a bit faster with the RenEvo website, i am holding an open contest to all graphic designers for a RenEvo logo.

Contest Information:

All submissions will be sent to logocontest@renevo.com, must be in layered psd format (zipped please, gimme some relief with my email account), and must be at least 400w X 400h. Remember, this is a logo, not a banner.

When submitting your logo, please include the following information about yourself, real name, screenname, mailing address, and age. This is for prize redemption.

Contest Prizes:

The logo that is selected will become the premiere trademark of RenEvo Designs & Software, upon selection of your logo, you will be give a choice of one of two prizes.

1. 512m DDRam Memory (1x512)
2. 512m RDRam Memory (2x256)

Both are high quality sticks of memory (Kinsington) and are in perfect new condition.

Prizes will be shipped exactly 1 week after a winner has been selected.

Contest Rules:

By submitting your logo design, you understand the following:

RenEvo Designs & Software WILL NOT use, retain copyright, or allow usage of your logo if you do not win the contest, it will simply be dumped into the recycle bin and deleted.

RenEvo Designs & Software WILL assume copyright over the logo that wins the contest, and will be used freely and solely for the use of representing RenEvo Designs & Software.

The winner of the contest, after redeeming prizes, will not retain any copyright, ownership, intellectual property value, or royalties from the logo, by submitting and winning this contest, you are essentially being "paid" for the logo, in which time, the ownership is handed from you to RenEvo Designs & Software.

NO unoriginal art shall be submitted and will be automatic grounds for disqualification.

Explanation of "unoriginal art": Any art not created, developed, or concieved by the artist, i.e.

clipart, game screenshots, photographs, etc... unless you are the author of the photograph as well, in which time, it will not contain any content of people or places.

Contest Cut Off Date:

Currently i am shooting for about Febuary 13th for the contest cut off date, if there is no selected winner on that day, the contest will remain open in a first good first win basis after that, meaning, if someone submits something after the initial cut off date, and there was no winner, it is subject to winning.

Good luck to all, and lets see that talent show through for originality and skill, c'mon, there is 512m of memory out there just waiting to be won!!!!
