Alkalineahh ok...I was about to say...

well nothing you can do there I guess... :oops:

I have noticed a pattern on my server, this only seems to happen when the server is started for the first time after a long delay.

Hence I start the server see one crash about 5 minutes in then my server stays up for days. (I normally shut it down on Monday, because I use the connection for "real" paid work then).

Gib
