Okay. Turns out that all the orginal versions from different language versions (english, german etc) have all the same checksum. So I don't need them.

I have obtained about 5 no cd key patches/game.exe copies. I am posting the checksums here. Use md5sum
on your game.exe to find out if you have a different no cd key patch other than the ones we already have. PM me then please.

The last one is the official 1037 game.exe.
