BlazerHmm definitely an issue with perlglob, or the path to the data directory not set right. Do you have spaces in your defined paths?

FDSConfigFile = G:\Westwood\FDS\Server\Data\FanMaps.ini  
FDSLogFilePath = G:\Westwood\FDS\Server\  
path to the data directory ???

G:\Westwood\BRenBot-131  
G:\Westwood\FDS\Server\  
G:\Westwood\FDS\Server\data

!rotation does work on both IRC and In-Game so in a way its not a problem the !maplist doesnt work, but because of this the !setnextmap, !vote nextmap and !vote map dont work neither :/
