Does the domination script have a neutral period between captures?

Like say GDI controls it, a nod guy comes in, and sits there does it go
GDI-10sec-Neutral-10sec-Nod
Or does it just go right from GDI to Nod?

Also, what happens if there are one person or more from each team in the zone?
What if the Zone belongs to GDI and a Nod player enters the zone?

Personaly I think that if the zone is empty, and someone enters it, and it doesn't belong to them it should first go to netural then change to the ocupieing team.

If the Zone belongs to a team and that team has someone in it, then someone else from the other team enters the zone, it should still change to neutral, but then remain neutral until only one team remains in the zone.

Maybe have an optional timer that will return the Zone to neutral if no one is in it after a set amount of time. If it is set to -1 or 0 or what have you, the timer will not be used.

Is there a king of the hill script yet?
