hmmm Fairfax, off by only 50 or so miles! I'm guessing the "location" is of your ISP.

This is the best of them all:

Quote: \* If a file from YOUR OWN computer can BE OPENED when you click HERE! (It should open c:\windows\win.ini as an example)

The url for the link is: view-source:file:///c:\windows\win.ini

I must be safe, it didn't open in Mozilla.
