mrpirateThe most common problem I have noticed is the poor SFPS many servers experience. So no... I won't stop complaining until hosts stop running the FDS on their 100 MHz Pentium.

its actually the bots and scripts they are running.. with all the players and all the logs the bots have a lot of logs to search thru for ladders recommendations.. if they are banned and for what reason...

becoming a strain on servers... even tho all these new things make the servers kewl.. the lag totally ruins it.. it is almost unplayable on most servers
