for call of duty Hermit created a programme called renpak that renames all CoD's custom map and skin .pk3 files to .hk3 so you dont get kicked from pure servers

could'nt someone create a similar programme for renegade
so all you have to do is click one button to change custom skin files so qkick doesnt happen

see hermitwares website here http://www.hermitware.com/h-home.php

just a suggestion maybe it will help
