I am bored, and saw a topic similar to this on the DG forums. I thought it would be interesting to see a little comparison. Post what pop-up blocker you use, and if it has a counter, post a screenie of your current total count. I want to do this because I know many of you prefer Google Toolbar, and though I never liked it I want to see how efficient it is.

I use Myle2 and haven't seen a pop-up since I installed it. I personally will be very surprised if anyone can beat my total count
