To-do list before 1.5 is released:
1.test (and/or get someone else to test) and fix if needed the folowing scripts:
JFW_Chronotank
JFW_Invulnerability_Timer
JFW_Iron_Curtain_Zone
JFW_Chrono_Beacon
JFW_Chrono_Controler_Zone
JFW_Damaged_Send_Custom
JFW_Enemy_Seen_Send_Custom
JFW_Enable_Spawner_On_Custom
JFW_Enable_Disable_Animation_On_Custom
JFW_Custom_Toggle_Visible
new functionality in JFW_Resource_Field
new functionality in JFW_Resource_Collector
2.finish the work on the stuff for the LFDS+scripts (Datalore is doing that, it may not make 1.5, it may have to wait for 1.5.1)
and 3.any more reasearch into the internals of the scripts.dll and its code (1.5 already includes more research and internals stuff than 1.4 did)
