Someone from here once IM'd me a link about how to get rid of pop-ups from all kinds of different free webhosts and stuff like that, and I was just wondering if anyone knows how to get rid of the pop-ups that come up when you use a .tk domain, I'm not using one but I'm making a site for a friend of mine and I was gonna get him a .tk domain. ALL HELP IS APPRECIATED GREATLY
