Subject: Bandwidth detection
Posted by Scythar on Tue, 09 Mar 2004 17:14:05 GMT

WOL automatic bandwidth detection doesn't work too well for me, it often detects my 512/512 as 1Mb or something. 512kbps isn't in the list though...do I have to use the automatic detection or is there a way to set WOL to use a custom bandwidth setting?
