dead4ayear2[sgthe0ne]They do make it seem as if the AI will 'obey' your radio commands cause they have those little arrows over their heads when U get close to them in an APC etc...but like you said the shit just dont work.

Good luck

Starting to think you're a n00b. "U". What next? "Ur"?

And I'm starting to think you hold a grudge against me. It is quiet obscure to criticize someone on their choice of typed verbiage in reference to the words I chose to shorten. Especially considering that they fall within the general accepted usage for this type of communication. You should realize that logic is very much a two way street. Using yours I could call you a 'n00b' for failing to properly construct sentences..but that would be ghey now wouldn't it ? I'm adding valid input to a thread based on recent personal experience and all you come up with is 'trying' to slam me for typing 'U' instead of 'you' !

I do not reside in the intellectual sand box but can come visit you here as often as you deem necesarry. I can not make you something you are not.

Better to remain silent and be thought a fool than to speak out and remove all doubt.

Abraham Lincoln

Wise men talk because they have something to say; fools, because they have to say something.

Plato

Sometimes this doesn't even seem like it's real...then I remember it is and it saddens me.
