phhs... some team/peoples change and get better... some dont change and still get annoying.

IMO thats make un-friendly community. i dont care of other mods try to do some competion. there is nothinf bad to this.. but bashing the other mod nah. that give a bad idea of the community. dunno why the "bashers" havent realized that and still continu with these childish actions.

Community could be better... and should be better. maybe renegade is dying.. maybe not. but if its the case.. we should do our best to keep it. JonWil, Blazer, Crimson, Dante do alot for the community and they dont bash anyone. yea there maybe some other people i aint mentioned... they do a good job too but some arent really friendly.

Should we support reborn? why not? there have been more ugly or unfinished mods than this one. Supporting it, helping it give renegade more opportunity. is there was only renalert.. well this might be boring after a while. im not saying the mod suck, im just saying diversity make the player happy. Reborn has alot of cool stuff. still isnt finished and have bugs. but which mods havent got any bugs? havent got ugly stuff at the beginning? none. Everyone mods started by being ugly and buggy. Yea they did released a buggy beta and un blanced but its fun to play. Having digable vehicle its cool. and idea wich was originaly impossible to do its makeable today. At leats THEY are trying to do something different.

do i am a pro reborn player? nah. i never liked the Tiberian series... only red alert one.

so back to the main idea, stop doing "yea lets bash mod X" thats very anoying and useless thats create spam for nothing... just make peoples anoyed by these post/reply.

peace
