Tiberian Sun was a pretty good game, but it lacked and wasn't as good as it was hyped to be. Tiberian Sun was a good game, but on the other hand, Reborn was/is a crappily done mod with little to no quality what so ever, "...because I liked Tiberian Sun more than..." should be the last reason to choose Reborn.

Anything Renardin does now will make the mod better, simply because it just can't get any worse than it is now.
