Ok this was the first time my server "crashed" for me. it started by that this guy joins and kill 3 flame tanks and 1 stank with soldier in 2 seconds (he just joined) so its 100% sure he cheated so I went back to mirc and since you cant ban this guys nickname I checked his player ID, nr3. I typed

!ban 3

(forgot the reason why tho)

!kick 3 Stop cheating idiot

Then I open up my renegade window again and the server crashed from the linux computer it was hosted on.

Happend to anyone else or was I the first?

Anyhow the cheaters IP were 0.0.8.240 and that dont work really good to ban so....I dont have an ip to report im sorry.
