Sir Phoenixx
I have the manual (in adobe acrobat) that came with the Tiberian Dawn win95 cd which has
pictures of the units and their description. I can zip this up and send it to you if this is what you
need.

The allies didn't have the mammoth tank, but GDI did.

(I swear I responded to this last night *puff puff pass*)
If you could email that zip to the address in my sig that would be great. Let me know if the msg is
to big & hopefully we could work out a different way. Thanks a lot.
