wow look what started from little old me. At the time I was truly pissed because everytime you killed me I flew 10 feet across the floor after I died. I thought it was you, but it looks like my conn was having some problems. I wanted the SS to be positive you weren't doing any lag boting or the like, but it was my mistake. Sorry for trying to do my job, though it was unwarranted, you shouldn't make it into a Broadway performance.
