I've bought ut2004. I played the demo alot. so I decided to buy it. but for some damn reason, the serial code is wrong . so I went back to the shop where I've bought it. I got a new one, I tried to install it. and again, the damn serial code is incorrect . so I went back again. now I have to wait till monday. then they call to the producer . I nearly trew the game + my computer through the window :twisted:

ps. I tried a key generator. it worked. ut2004 has 6 damn cd's. when I tried to install it with the key gen code, the installation crashed when I needed to put cd 3 in my computer. man... fuck the damn game :twisted:
