[A-INastyDead]I think I'll just wait til' a full version patch for the beta for Half-Life 2 comes out, or the full version patch for Doom 3. But what I want really bad is for a new game like renegade. Renegade u dont half to wait for vehicles to spawn and yur not absolutely fucked when attacking a vehicle, and u can shoot from a vehicle in 3rd person.

You can in BF:Vietnam too. Press buttons F9-F12....or is it F9-F11....either or. You can!

Anyways, I think once they patch this game a few times and add a few things this will be sick! I mean the knives suck big time, I was extremely dissapointed in that. As for the shovel, just look closely youll find them in the maps.

The m14 is just a sick weapon, I get more headshots with that then using the sniper rifles, patience = lots'o'headshots!

PS: Anyone dissapointed on how you cant melt the Vietcong with your torch as an engee? That wouldve been sick, but oh well, im sure theyll possibly patch that.
