If anyone can remember that post where about the version of LE that was supposed to be an editors edition or whatever, I dled it so that I could get my comp to temp correctly. Unfortunately, it temps correctly but at a price, which is I CANT SEE ANY SERVERS ON RENEGADE!! I exported as a .mix for the first time since I reinstalled Renegade for the same problem 2 weeks ago. Now I dont know what to do.. I can talk to everyone in chat and post messages, but no one can see me in my game nor can I see any other games. There something about this version that is screwed up?
