lol easy there peoples, i was kidding around jeez. I only ever jumped one person because he said he wanted to rape my little sister, so we jumped him on halloween and proceeded to beat the living shit out of him, i think it was called for and fully justifiable. All other fights i've ever been in i fought fairly and thats not many fights if you dont count me fighting with my bro

Didnt mean anything by it, sorry Z, madtone hope you guys can forgive me
