Subject: +CE+ Clan Server

I've acquired a 20 player dedicated server - CEserv1 (US servers). It will primarily be hosted for clan games, any clans are welcome to use it if my clan isn't. (Password: lies)
Most of the WOL maps are in the rotation except Hourglass cos it sucks.

However if a CE player pages you in-game, then kindly finish the game you're in, then leave so we can use the server.

If it's a slow day for clanners, I may occasionally switch it to an open AOW public server
