KujoYes i did have a problem at first.  In the readme file provided in the .zip, it says that there will be a new icon in the tray......there isnt...what i did was in RenX, go to "Customize" and click on "Customize User Interface".  Then i just scrolled down the list until i found "Import a W3D file" and assigned a hotkey to it.  For Ex: "Ctrl+Alt+Shift+I"

Thats exactly how to get it to work Just assign it a hotkey. I used Ctrl+I. Thanks so much to kujo of the renstation.net modding forums.
