---

Buggyhi, sry, I can not connect with putty to my server. Can I install the server about otherways? If I will start `renegade_server_1037b_rh8-0` with the command `./renegade_server_1037b_rh8-0` at the console of Webmin I get:

```
> cd /home/cncre/
```

```
> ./renegade_server_1037b_rh8-0
```

```
Error initializing non-canonical I/O mode
```

What can I do? I need your help very fast, thx

Use the "SSH" option when connecting with putty, not "telnet". You need a real console, and that is putty. Webmin console will not work.
