(Baton Rouge, Louisiana-AP) March 18, 2003 - DNA evidence has linked the slaying of a college student to a serial killer who has murdered four other women in Louisiana, authorities said Tuesday.

Have you seen this piece of shit ? I'm posting this cause I'm in Houston TX and consider this kind of jerk-off to be a very dangerous threat to society & the general area he resides in. So if you live in *the area* keep an eye open...for everyones good.

This person may very well now be aware that he is in 'deep shit' and may try to flee or commit another heinous crime.

(No I do not intend to cycle the news of the day through these boards but serial killers = nasty.)
