Hmmmm.....

I am not as fond of this tank as I am of some of the other RA vehicles.

I think it still needs to be worked on a bit. If you look at the intersection between the greenhouse (part with windows) and the main body, the body is very dark, and then it suddenly becomes much lighter at the greenhouse.

Looking at that side picture, it looks very blocky.

I love the general color and shape of it, but it needs to be enhanced a bit.
