Titan1x77Texture alignment looks like shit.

Model is worse the the textures.... looks like pheonix ripped off the bottom of the mammy any thru some box's on it.

I thought "Your" team only did quality work...even if the tank blows up,You shouldn't settle for that lousy looking tank for the mod.

I disagree.

Looks just like a M.A.D. tank from Red Alert to me.

I hated these things. Too slow. Definatly not a sound you want to hear when you are an allied commander.
