AlkalineGTCienAlkaline this is advertising not spam!

A wide difference !!!

heh sounds like the words of a company that sends mass emails.

I think its spam because you can't join the server, you can't download renguard, and it is always on top of the List.

Atleast if renguard is out it would make sense, but right now its spam.

Ahem....

You can't join the server, that doesn't mean that other people can't join.

You can't downlaod Renguard, that doesn't mean that other people don't have it.

Now shut your hole and go away.
