Alkaline

Because westwood ran out of maps to give him and Titan's stuff was showing so much more superiority... in my own self righteous opinion.. No point in being the map maker if your the king.

Seriously Alkaline, you need to STFU. I don't usually post on here at all but I decided to make an exception. Ack spent countless hours making/fixing those maps so ungrateful shits like you can rubbish them... I also recall him being involved with getting the tools released?

Back to IRC I think.
