Subject: Renguard Problem
Posted by tooncy on Thu, 08 Apr 2004 14:26:44 GMT

When I boot renguard, it says this:
Unauthorized file data\autocomplete.ini has been found in your renegade directory
Disconnected from RenGuard network

I installed autocomplete in my renegade directory. It isn't a big deal, since I can just move it, but I think renguard should allow this file.
