Hello all first of all, im new at this forum,i used to be registerd here as csjpnod a 1.5 year ago. But seems it lost my old nick. Why i actualy registerd now again is because i cant run renegade with my Nocdcrack, I use Safe2diskcleaner 1.12. can anyone tell me why its not working anymore? Thanks to all people who designed and build rengaurd i hope every server will run this!!
